SIMPSON, Raymond

After living in Halls Creek for close to 8 years, and observing all our positives and negatives, I think its time to put my hand up and make a valuable contribution to our community through local government. I am fortunate to have worked in our satellite communities and got to know many of the local people over the last several years and listening to their concerns and aspirations makes me want to plat a bigger role in the community. This is to deal with some of the problems but to also highlight the positives including mining, tourism, and cultural wealth. Its no secret that we do have a few issues at the moment and I would like towards solutions more so than finger pointing and believe that we are moving into a golden era for this area and want to focus on exploiting every opportunity.
